1 Introduction

This Document describes the modification history of the ExpoM-RF4 App. It describes new added features and known and also resolved issues that has impact on the customers experience.

2 Release Descriptions

1.1.3	<ul style="list-style-type: none">- New Feature: User defined band names are displayed (Requires device's firmware release v3.5 or newer).- Resolved Issue: Devices are more easily found. In the previous version, if a connection was established, in some circumstances the connection was interrupted, thus lost. This issue is now resolved resulting in a reliable connection once established.
1.0.0	<ul style="list-style-type: none">- Initial Release
